

# JUNTAO WANG

Address: 2001 Longxiang Road, Longgang District, Shenzhen, China

Tel: (86) 150-7960-1220 | E-mail: [juntaowang@link.cuhk.edu.cn](mailto:juntaowang@link.cuhk.edu.cn)

Website: <https://juntaowang99.github.io/>

## EDUCATION

The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen)

Shenzhen, China

*Candidate for B.S. in Statistics (Stream: Data Science)*

Sept. 2018 – June 2022 (Expected)

- **Cumulative GPA:** 3.508/4.000; **Major GPA:** 3.737/4.000
- **Core Courses:** Gaussian Process for Machine Learning & Signal Processing (**Graduate level**), Regression Analysis, Techniques for Data Mining, Probability and Statistics, Discrete Mathematics, Statistics Software, Programming Paradigms, etc.
  - **Technique skills:** Python (proficient, especially with PyTorch, OpenCV-Python, GPyTorch, etc.), MATLAB (proficient, with GPML Toolbox), C++ (proficient), R (proficient), LaTeX (proficient), MySQL (basic), Julia (basic)
- **Awards:** Bowen Admission Scholarship, Dean's List Honor for 2019-2020 & 2020-2021, Undergraduate Research Award

## RESEARCH EXPERIENCE

Graph Neural Network for Large-Scale Network Localization

Shenzhen, China

*Co-author, Research Project of Ph.D. student Mr. Wenzhong YAN*

Sept. 2021 – Now

- **Reviewed, summarized and analyzed** mainstream Graph Neural Networks models (e.g., GCN, GraphSAGE, GAN, etc.)
- **Conducted** the experimental result part to test the performance of baseline models on our formulating problem scenario; **identified** the problems in the simulation experiments; **created** some ideas to solve the latent problems in our model
- **Imagined** more applicable scenarios of our formulating problem; **gathered** and **reviewed** relevant literatures
  - **Output:** Experiment code, 1 academic report slide; 1 research paper (in progress)

Prediction of Wireless Network Traffic in High-Dimensional Beam Space

Shenzhen, China

*Research Assistant, Joint Research Project of CUHK-Shenzhen & SRIBD & HUAWEI Innovation Laboratory for*

Sept. 2020 – Now

*Future Network Systems Optimization led by Prof. Tom LUO & Prof. Feng YIN & Dr. Qi WANG*

- **Processed** project data; **investigated** various deep learning algorithm (e.g., RNN, LSTM, Transformer, Prophet, etc.) and research progress in relevant fields; **constructed** writing framework and **coordinated** group members to write reports
- **Reproduced** LSTM model and Prophet model via PyTorch for our problem scenario; **constructed** LSTM-PageRank model for spatiotemporal prediction problem; **proposed** Multi-LSTM Attention model for complicated time series prediction; **tested** and **optimized** the performance of LSTM, Prophet, LSTM-PageRank and Multi-LSTM-Attention models
- **Cooperated** with group members specializing in Gaussian Process model to complete the task of time series prediction; **assisted** group members specializing in Graph Neural Network in the research of spatiotemporal prediction models (e.g., LSTM-GCN, Conv-LSTM, etc.)
  - **Output:** Project code, 2 report slides, 4 progress reports; 1 patent (pending), 1 research paper (in progress)

## WORK EXPERIENCE

HUAWEI Technologies Co., Ltd., Desktop & Smart Office Accessories Development Dept.

Dongguan, China

*Internship of Intelligent Manufacturing and Precision Manufacturing R&D Engineer, Product & Solution Test*

July 2021 – Sept. 2021

- **Participated** in the development of HUAWEI's first printer product PixLab X1; **involved** in the testing and improving work of printing effects (far exceeds compatible products at the final release)
- **Developed** an automatic detection of printing effects testing tool (including image processing via OpenCV-Python, GUI development via Tkinter, ML Algorithm, etc.) to make the detection on the production line more efficient and precise
- **Utilized** the tool to figure out printing effect defects and **assisted** development group to solve these issues; **managed** the deployment of the detecting tool on the production line
- **Learned** and **researched** image processing algorithms and **taught** them to other group members; **extracted** the main points of an

international standard of printing effects and **translated** them into Chinese for the whole group to read; **appraised** for **The Best Intern Award** after 3 rounds of assessment

■ **Output:** Tool code, 2 product testing reports; 1 Industry Standards (in process)

## PROJECT EXPERIENCE

### A Graph Prediction Model Based on LSTM and Personalized PageRank: LSTM-PageRank

Shenzhen, China

*Team Leader, Course Project of Web Analytics and Intelligence*

Apr. 2021 – May 2021

- **Assigned** tasks to teammates and **coordinated** them to do numerical experiments and write project report; **handled** the whole progress of our project; **summarized** and **analyzed** the experiment results; **presented** our project in class
- **Proposed** our model LSTM-PageRank combining LSTM (what I was familiar) with PageRank (what I newly learned in class) and Personalized Propagation of Neural Prediction (what I reviewed in others' research)
- **Formulated** our research problem; **designed** the simulation experiment and evaluation mechanism; **constructed** benchmark models and LSTM-PageRank model via PyTorch; **assisted** teammates to solve issues arising in experiments

■ **Output:** author of the project code; co-author of 1 project report and 1 presentation slide

### Electricity Load Prediction via LSTM: an Exploration of Predictability and Granularity

Shenzhen, China

*Team Leader, Course Project of Techniques for Data Mining*

Apr. 2021 – May 2021

- **Processed** the Pecan electricity load dataset; **set** goals of our project and distributed subtasks to group members; **reviewed** relevant literatures and **identified** the main problem to explore; **presented** our project in class
- **Constructed** LSTM model and **implemented** the numerical experiments; **collaborated** with teammates to compare Deep Learning model with traditional Machine Learning models (e.g., Multi-Layer Perceptron, Decision Tree, etc.)
- **Conducted** experiments to explore the relation of predictability and granularity of time series; **verified** the theoretical results in research of *Wu et al.* with our experimental results

■ **Output:** co-author of the project code, 1 project report and 1 presentation slide

## EXTRA-CURRICULAR ACTIVITIES

### The CUHK-Shenzhen Student Ambassador Group Committee

Shenzhen, China

*Vice Chairman*

Sept. 2019 – Sept. 2020

- **Coordinated** departments of the Student Ambassador Group to organize 3 seminars involving a total of more than 2,000 participants; with individual responsibilities of volunteer scheduling and reception of participants
- **Organized** 3 "Thanksgiving Alma Mater" activities involving more than 200 high schools and **mobilized** more than 1,800 students; with personal responsibilities of pre-planning, on-site coordination and post-event feedback

### The Hult Prize Greater Bay Area Innovation Challenge

Shenzhen, China

*Team Leader, The 1<sup>st</sup> Runner-Up*

May 2019

- **Developed** an innovative profitable business plan with the theme of accessible travel and the aim of public welfare within 2 days; **competed** with 25 universities from the Greater Bay Area, and finally **won the 1<sup>st</sup> runner-up and start-up foundation**
- **Arranged** tasks to teammates and **handled** the overall progress; with personal responsibilities of the data processing (**completed** the collection and collation of thousands of data within 6 hours) of business surveys in related fields

## PUBLICATION

### PATENT

1. Feng Yin, Wenzhong Yan, \*Juntao Wang, Zhiquan (Tom) Luo, "A Spatio-temporal Prediction Method for High-Dimensional Beam Space Wireless Network Traffic", *pending for patent office approval*, Sept. 2021

### PAPER

1. Wenzhong Yan, \*Juntao Wang, Feng Yin, "Graph Neural Network for Large-scale Network Localization", *in progress*, Dec. 2021
2. Yijue Dai, Wenzhong Yan, \*Juntao Wang, Xinyi Zhang, Feng Yin, "Stacking Model for High-Dimensional Beam Space Wireless Network Traffic Prediction: Multi-LSTM-GP Attention with GAN", *in process*, Nov. 2021
